

Nuclear Physics Seminars – 2010

Date	Speaker	Title	Host
January 11	Spring Semester 2010 commences		
January 22	Seema Dhamija, Florida International University	"Measurement of beam-helicity dependent asymmetries for kaon electroproduction"	Scott Wissink
January 29	NO SEMINAR SCHEDULED		
February 4	Zach Medin, McGill University	NUCLEAR THEORY SEMINAR: "The Ocean-Crust Boundary of Accreting Neutron Stars"	Chuck Horowitz
February 5	NO SEMINAR SCHEDULED		
February 12	NO SEMINAR SCHEDULED		
February 19	NO SEMINAR SCHEDULED		
February 26	Brian Tiburzi, University of Maryland	"Electromagnetic Polarizabilities from Lattice QCD"	Adam Szczepaniak
March 5	Rishi Sharma, Los Alamos National Lab	"Many body effects in neutron star crusts and connection with observables"	Chuck Horowitz
March 12	Ekaterina Korobkina, North Carolina State University	"PUSTAR UCN source"	Chen-Yu Liu
March 19	Spring Recess		
March 26	Rex Tayloe, CEEM	"Measuring Neutrino Scattering in MiniBooNE"	
April 2	Matt Braby, North Carolina State University	"Transport theory in strongly interacting systems"	Chuck Horowitz
April 9	Steve Vigdor, Brookhaven National Lab	"Future Spin Physics at RHIC"	Will Jacobs
April 16	Ilya Selyuzhenkov, Indiana University -CEEM	POSTPONED	
April 23	NO SEMINAR SCHEDULED		
April 30	Christopher Bass, NIST	"Development of a fast neutron spectrometer based on lithium-loaded liquid scintillator"	Mike Snow
May 7	Finals Week - May 3-7		
June 4	Andrey I. Chugunov, Ioffe Institute, Russia	"Strongly coupled Coulomb plasmas in astrophysical objects"	Chuck Horowitz

June 11	Steve Linden, Yale University	"Measuring neutrino-induced pion production in MiniBooNE"	Rex Tayloe
June 18	Andrew Steiner, Michigan State University	"Determining the Properties of Nucleonic Matter, the Equation of State, and the Masses and Radii of Neutron Stars from Observations"	Chuck Horowitz
June 24	Kazimierz Bodek, Jagiellonian University	"R-correlation in neutron decay - recent news and perspectives"	Mike Snow
June 25	Changbo Fu, NIST/CEEM	"Limits on Axionlike Spin Couplings from the Relaxation Time of Polarized Gas"	Mike Snow
August 30	Fall Semester 2010 commences		
September 3	NO SEMINAR SCHEDULED		
September 10	NO SEMINAR SCHEDULED		
September 17	NO SEMINAR SCHEDULED		
September 24	Juan I. Collar, University of Chicago	"Dark Matter searches: an update on COUPP and CoGeNT"	Chen-Yu Liu
October 1	NO SEMINAR SCHEDULED		
October 8	Douglas Higinbotham, Jefferson National Lab	"Short Range Correlations and the EMC Effect"	Rex Tayloe
October 15	Wolfgang Korsch, University of Kentucky	tba	Chen-Yu Liu
October 29	B. Page, J. Stevens, L. Garrison, Y.Kim	DNP Talks	Chen-Yu Liu
November 5	NO SEMINAR - DNP MEETING		
November 12	NO SEMINAR SCHEDULED		
November 19	Jodi Cooley, Southern Methodist University	"In Pursuit of Dark Matter: Status and Prospects for the SuperCDMS Experiment"	Lisa Kaufman
November 23	Thanksgiving Recess - November 23-28		
December 3	Jim Musser, Indiana University - Physics	"Measuring the UHE Cosmic Ray Electron spectrum with CREST"	Chen-Yu Liu
December 10	Kangfei Gan, George Washington University	"Measuring parity-violating spin rotation of transversely polarized cold neutrons through a liquid ^4He target"	Rex Tayloe
December 13	Finals Week - Dec 13-17
